NFC-URL MANUAL

FOLLOW THE STEPS TO SET UP AND EDIT YOUR INTELLIGENT NFC-URL LINK:

- 1 Activate
- 2 Edit
- 3 Scan

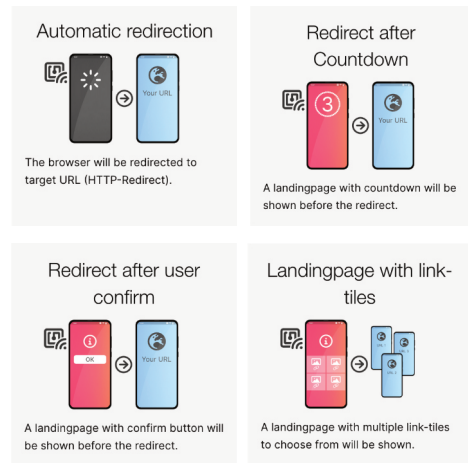

1 ACTIVATE NFC-URL

Activate your digital menu in 3 steps:

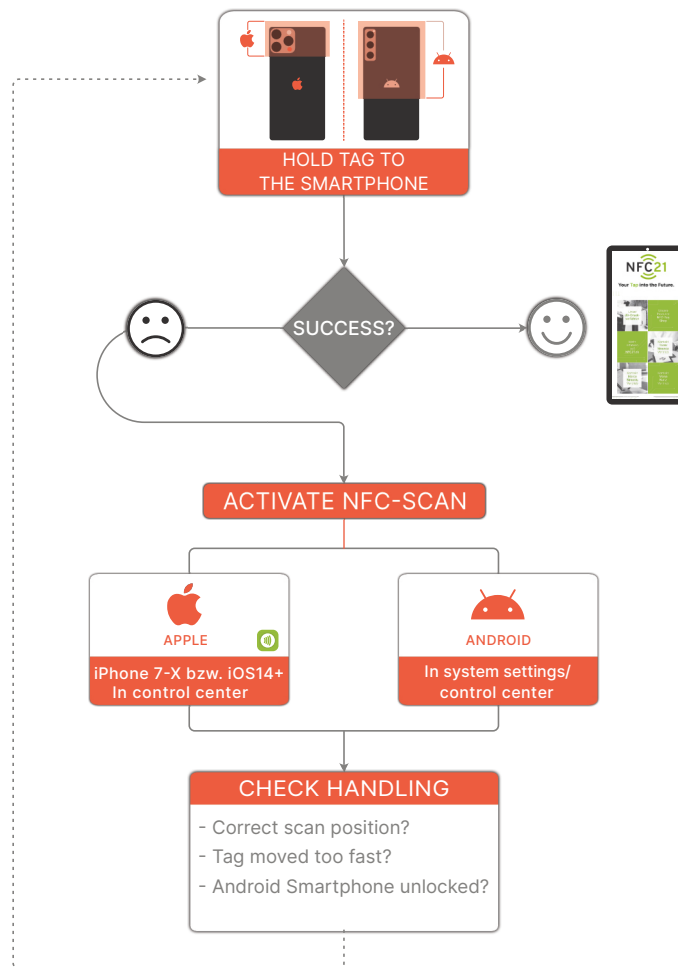

1. Scan the menu with an NFC enabled device at the labeled area. Now click on "Activate" to activate the URL.
2. Please register if you do not have a login yet.
3. The URL is now activated and linked to your account. You can start editing according to your preferences.

Choose your redirection type:

Once your new URL is activated, it will appear on the homepage of your account. The activated URL can now be edited:

- Click on "Edit NFC URL".
- Rename the URL in editing mode and select the type of redirection.
- Enter the required information into the form for the chosen redirection and save your input at the end of the page.
- Your page is now activated and can be used directly. Any changes are directly active upon saving. The changes are visible with the next scan or reload of the page.

1. Hold the tag to the back of the smartphone:

- 📍 To the upper area
- 📍 To the upper/middle area (depending on the manufacturer)

2. Successful NFC scan: 😊

- 📍 Confirm the NFC scan pop-up for proceeding to the website.
- 📍 The website opens automatically or after selecting your preferred browser.

3. Unsuccessful NFC scan: Activate NFC mode of the smartphone.

- 📍 iPhones 7-X: NFC app needed. Check settings:
→ 📍 add to control center.
→ Open control center and initiate NFC app.
From iPhone Xs: NFC already integrated by default/ no app needed.
- 📍 Search for „NFC“ in the settings of your smartphone and turn it on.

4. Repeat NFC scan: Back to step 1 and take listed suggestions into account.
